What is TUIS?

TUIS – The chemicals industry's Transport Accident Information and Emergency Response System

- Founded in 1982 by the German Chemical Industry Association (VCI)
- Injuries due to work and transport happen despite preventive measures
- Supports the important subject of occupational health and safety
- Part of the chemical industry's Responsible Care program

TUIS – The chemicals industry's Transport Accident Information and Emergency Response System

- TUIS provides competent assistance to public fire departments when accidents involving chemicals occur on roads, the rail network and waterways
- TUIS offers rapid, competent and unbureaucratic assistance when transport accidents involving chemicals or mishaps in storage areas occur, as well as in acutely hazardous situations
- 365/24/24

How does TUIS help?

- Level 1: Remote product information and general advice by telephone, e-mail or fax
- Level 2: Advice from an expert at the scene of an incident
- Level 3: Assistance with personnel/equipment at the scene of an incident

Who helps?

- Company fire departments within the chemical industry and other specialits e.g. chemists, toxicologists, ecologists, manufacturing experts
- 130 company fire departments within the chemical industry participate in TUIS

- ▶ Established player and integral part of public emergency response
 - ▶ Integrated in the ICE*-system of the European Chemical Industry Council (Cefic)
- ▶ TUIS provides competent assistance to public fire departments when accidents involving chemicals occur on roads, the rail network and waterways

*ICE stands for “Intervention in Chemical Transport Emergencies”

Thank you!
